

Basic Point of Care Ultrasound (POCUS) training for hospitalists

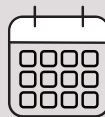

Join us for an interactive training designed to enhance your clinical skills using Point of Care Ultrasound (POCUS).

This session focuses on teaching hospitalists how to accurately acquire and interpret basic ultrasound views at the bedside, leading to faster, more informed medical decision-making. By learning to evaluate unstable patients in real time, you'll improve diagnostic accuracy and reduce delays in diagnosis—ultimately increasing patient safety. POCUS serves as a valuable, complementary tool to the clinical exam, strengthening your clinical judgment and enabling you to provide more precise, high-quality care.

Accreditation Statement

Sentara is accredited by the Southern States CME Collaborative to provide continuing medical education for physicians.

Point of Care Ultrasound (POCUS) training for improved diagnostic accuracy and patient safety

Wednesday
December 17, 2025
8 a.m. – 4:30 p.m.

EVMS Lester Hall
651 Colley Ave.
Norfolk, VA 23507
