

TOP HCC CODING OPPORTUNITIES

NEUROLOGY

ICD-10	HCC Diagnosis	Supporting Evidence	RAF
E66.01	<u>Severe</u> Class 2 Obesity w/co-morbidity Or Morbid Obesity: BMI >40 <i>(Avoid sole use of BMI Z codes)</i>	BMI 35 to 39 w/CC: 1 of: CHD or AVD or DM or OSA or 3 of: age >45 (M), >55 (F), HTN, HLD, IFG, Tob, FH early CVD	0.25
E66.2	Morbid (severe class II) obesity with alveolar hypoventilation	BMI 30+ with obesity hypoventilation syndrome	0.25
E44.1 E44.0 E43 E46	Malnutrition	<i>Mild</i> : 17 </= BMI < 18.5 <i>Moderate</i> : 16 </= BMI < 17 <i>Severe</i> : BMI < 16	0.455
R64	Cachexia		0.455
I69.35X	Hemiplegia/Hemiparesis, as late effect of stroke <i>(Specify Laterality and whether dominant or non-dominant side)</i>	Hx CVA, physical exam	0.437
I69.33X/I69.34X	Monoplegia of upper or lower limbs, as late effect of stroke <i>(Specify Laterality and whether dominant or non-dominant side)</i>	Hx CVA, physical exam	0.331
G81.9X G83.0 G83.1X G83.2X G83.3X	Hemiplegia Diplegia - Upper limbs Monoplegia - Lower limb Monoplegia - Upper limb Monoplegia - Unspecified limb	Physical exam	Hemi- 0.437 Mono/Di- 0.331
G82.XX/G82.5X R53.2	Paraplegia/Quadraplegia Functional Quadraplegia	Physical exam	Para -1.068 Quadri - 1.242
F03.9X G30.X F01.5X G31.01 G31.83 G31.85	<u>Dementia with or without behavioral disturbance:</u> Unspecified dementia Alzheimer's w/ early or late onset Vascular Pick's disease Dementia with Lewy bodies Corticobasal degeneration	Neurology report, imaging, cognitive testing, physical exam	0.346
G91.9	Hydrocephalus	Physical exam, imaging, neurology report	0.346
G35 G37.9	Multiple Sclerosis, Demyelinating diseases of central nervous system	Symptoms, physical exam, imaging (MRI), CSF studies	0.423
R56.9 R56.01/R56.00 R56.1 G40.909 G40.89 G80.9	Unspecified convulsions Complex/simple febrile seizures Post traumatic seizures Epilepsy Other seizures Cerebral Palsy	Symptoms, physical exam, febrile, imaging, EEG, meds Physical Exam	0.22 0.339

TOP HCC CODING OPPORTUNITIES

NEUROLOGY

ICD-10	HCC Diagnosis	Supporting Evidence	RAF
G70.0X G61.0 G61.1 G70.9	Myasthenia Gravis Guillain-Barre Serum Neuropathy Myoneural disorders	Symptoms, physical exam, labs (autoimmune markers), imaging	0.472
G62.1 G62.82/G62.0 E11.42	Polyneuropathy: Alcoholic Radiation/Chemo-induced Diabetic	Symptoms, physical exam, history of etoh abuse, hx of chemo/radiation, +DM, EMG, monofilament testing	0.472
G62 G62.119 G21.4	Parkinson's Disease: Secondary - drug induced Vascular	Physical exam - bradykinesia, cogwheel rigidity, resting tremor, postural instability	0.606
G10	Huntington's disease	Genetic testing, physical exam, family history	0.606
G12.21 G12.23 G12.24 G12.29	Motor neuron diseases: (ALS, PLS, familial, other)	Symptoms, physical exam, EMG, family history	0.999
G71.00 G71.2	Muscular dystrophy, congenital myopathies	Symptoms, physical exam - strength/reflex testing, labs, genetic testing	0.518

M – Monitor - Note whether stable or worsening

- (If you are not managing Dx) Note if followed by specialist/PCP - last visit & next follow up if any

E – Evaluate - Note any recent results of diagnostic testing for condition

A – Assess - Note if any labs imaging or referrals are going to be made for condition

T – Treat - Note if any medication changes occurred or continue same

Only **ONE** element of MEAT is required per coding guidelines, more is better and preferred but not required
